

PRE-FILLED CUPS MEAN NO FUSS AND NO MESS

The Capresso 1000 pre-filled cup drinks system delivers high volume with low maintenance. Because cups are pre-filled, there's no mess to clear up when it's time to refill the machine. This means it's quicker to load, and simple to use. Just load the pre-filled cups and it's ready to serve. With a 900-cup capacity, it means longer fill intervals too, and that's ideal for large locations. So let your employees enjoy no mess, no fuss, just quick and convenient drinks on demand.
